PRIMARY EXAMINER**

The following is an examiner's statement of reasons for allowance: applicant claims a nut cracker in the independent claims having a connecting link with wide and narrow portions. There are two other members connected to the slotted member by pins. One of the pins has a narrow portion and is axially adjustable to allow the narrow portion to be engaged with the slot. This allows for the adjustment of the two members with respect to each other. The art shows members with cups and two lever systems with a connecting slotted link. There are no adjustable pins with a narrow part shown however. This feature is not shown in any of the references and is not thought to be made obvious or be suggested by the art of record. The claims are thus allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
